05/14 >>

#### Reference:

The following information must be reviewed before beginning the assembly:

The installation instructions are to be thoroughly read.

The installation should be carried out by qualified personnel with the relevant technical knowledge.

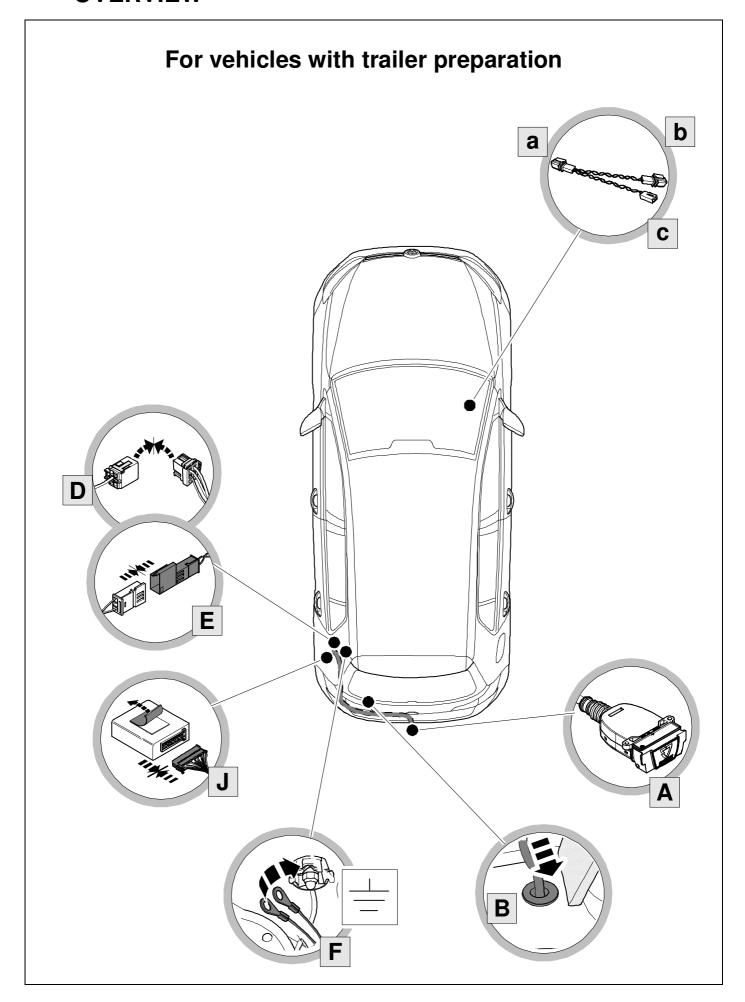

The vehicle manufacturers' current technical notices and information on retrofitting must be followed.

The removal and replacement instructions found in the current repair manuals must be followed.

It must be ensured that the vehicle is technically suitable for the installation of a trailer hitch.

# **OPTION** vehicle coding

#### **OPTION vehicle coding**

#### Coding with VCDS, please note:

The procedure described below for encoding and enabling the trailer mode only serves for a general orientation and can vary greatly depending on the model (motorisation / equipment). If necessary less or further control units will have to be adapted.

- After connecting to VCDS, the "69 trailer function" controller has to be set to encoded in the \_19 installation list.
- > Coding EZE\_09

#### (electronic central electric controller; Login 31347)

Diagnosis / Networking plan / Controller self-diagnosis encode hitch\_ecu > installed Vehicles from (MJ 2017>>) adjustment > channel -integration trailer control unit > installed

> Coding ZKS 46 (Central module convenience system)

trailer monitoring > put on active trailer control unit > installed

Coding\_03 (Brake Electronics; Login 61378)

Adjustment > channel - trailer stabilization, change value to > active

Encoding SWA\_3C (Lane Change Assist)

ECU for draw bar > with ECU for draw bar

> Encoding SCH\_ 17 (Dash panel insert)

Trailer > yes

> Encoding RFK\_6C (reverse camera system)

equipment\_ahk > installed

Encoding STF\_74 (chassis control system)

Trailer > installed

> Encoding EPH\_76 (PDC controller)

Trailer > trailer device can be removed manually

Encoding DiS\_13 (controler distance control, possible Login 20103)

Control module for towing sens > installed or Control module for trailer recognition > installed (Byte 03 Bit 03)

> Encoding FFF\_A5 (front sensor system controller)

AAG > coded

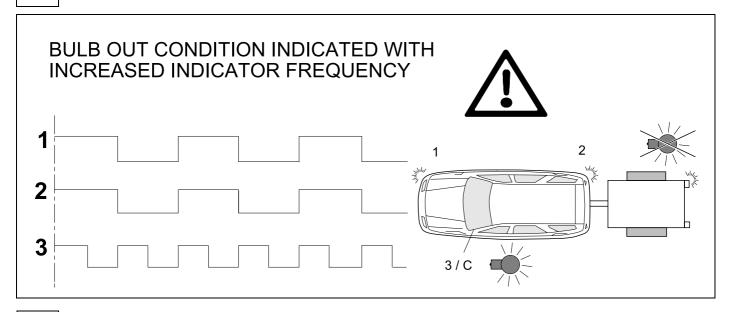

Encoding HDE\_6D (boot lid electronics controller)

Trailer > installed

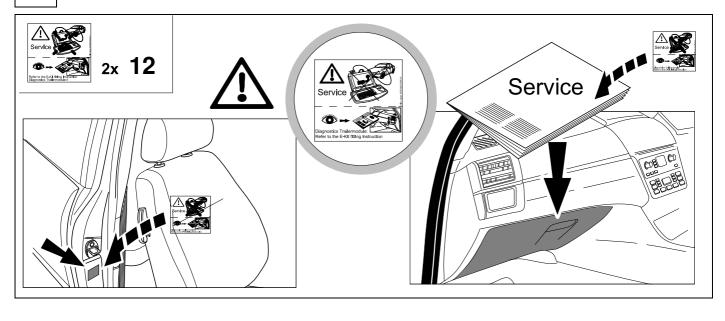

#### Important note on encoding and activating in trailer mode

The aforementioned settings are carried out in the vehicle's electrical system and saved locally. During general updates for the vehicle software (for example, within the scope of service or repair work) the settings may be overwritten and deleted under certain circumstances. At this case, the trailer mode activation has to be updated again locally after the update. Diagnostic information relating to the trailer mode that may appear during variance comparisons with the data saved in the manufacturer's works, may form the basis of the local activation
